

New fields: PFRA

- CrossBorderRelationship
- CrossBorderFloodLocationCode
- OtherAssociatedFloodLocations
- FloodLocationCode
- FloodLocationName
- SpecificAreaCode
- SpecificAreaName

Changes: PFRA

- New options in DateOfCommencement (past: DatePastFloods):
-7777, -8888, -9999
- New value in Codelist TypeOfPotentialCons.: 'Not applicable'
- NameOfLocation renamed in NameOfFloodEvent

Deleted or concentrated: PFRA

- OtherAreaName
- AllTypesFlood
- FloodType seperated in
 - SourceOfFlooding, MechanismOfFlooding and CharacteristicsOfFlooding
- HealthDegree seperated in
 - HealthDegreeTotalDamage, HealthDegreeTotalDamageGDP, HealthDegreeTotalDamageClass
- EnvironmentDegree seperated in
 - EnvironmentDegreeTotalDamage, EnvironmentDegreeTotalDamageGDP, EnvironmentDegreeTotalDamageClass
- CulturalDegree seperated in
 - CulturalDegreeTotalDamage, CulturalDegreeTotalDamageGDP, CulturalDegreeTotalDamageClass
- EconomicDegree seperated in
 - EconomicDegreeTotalDamage, EconomicDegreeTotalDamageGDP, EconomicDegreeTotalDamageClass

- RBD_CD
- WA_CD
- PLANU_CD

- CrossBorderRelationship
- CrossBorderFloodLocationCode

- FloodType seperated in
 - SourceOfFlooding, MechanismOfFlooding and CharacteristicsOfFlooding

Cross-border water bodies

- Existing field: RWSEG / GroupCode
- Countries have to agree to a shared code
- The code has to follow the syntax:
 <CountryStateCode>_<Any_Code><_Int>

For example:

- DESN_4711_Int
- CZXX_1234_Int
- The CountryStateCode could be built by the country which has the bigger part of the water body.
